

To whom it may concern:

Mr. Willison assisted with the City of Peoria's 800 MHz Trunked Communication project. The City of Peoria contracted with Mr. Willison after the first Request for Proposal process was unsuccessful in bringing an acceptable proposal for the City's needs.

Mr. Willison worked with the various departments and agencies associated with the project in a timely and professional manner. Mr. Willison brought many ideas, thoughts and experiences to the drawing table and was always available to answer questions and give advice on technical issues.

The City is now implementing the new 800 MHz Communication system for non-public safety Departments and will complete the project within the next few weeks. To date, the system is meeting the needs of the user departments and everyone's communication capabilities have been enhanced by the new equipment.

Mr. Willison's work included submitting the preliminary and final drafts of the re-written Request for Proposal specification, advised on technical issues, assisted with the development of the proposal evaluation tool, reviewed the proposals with the selection committee, and made an independent recommendation to assist with the award of this project.

Mr. Willison was a pleasure to work with and taught us many of the do's and don'ts of Request for Proposals for Communication Systems.

Sincerely,

A handwritten signature in cursive script that reads 'E. Kay Harmon'.
