To Whom It May Concern:

Starke County contracted with Mr. Jim Willison, owner of Advanced Communications Design & Consulting, INC. of Lafayette, Indiana, to assist us in writing the bid specifications for new radio equipment to be installed in conjunction with our new 911 communications center.

Jim Willison was found to be very knowledgeable and proficient in the areas of design of console equipment, base and mobile radio equipment, and dealing with the different vendors that were involved in the make-up of a 911 communications center.

I am pleased with the County Board of Commissioners decision to contract with Jim Willison for our construction. Jim has made recommendations that made planning, construction, operations, and overall design a workable project for our department.

Sincerely,

Randy Wakefield
Starke Co. Sheriff
