Dear Jim,

March 5, 1997 our new radio system and Emergency Service facility was officially completed.

In the infant stages of planning this new facility we realized we needed a professional consultant to design our new radio system, oversee the bidding processes, help with invoices, and over see the installing of equipment for our project.

Jim you did all this and more for our county. There was a time when our entire project stalled for a period of months because of a financial issue, and you went the extra mile for us until we were on track once again.

You always conducted yourself in a calm, reassuring, and professional manner. On behalf of the board of commissioners and my self I want to thank you for a job well done.

Sincerely,

Joy Diefenbaugh
Director of Dispatch
