RE: ADVANCED COMMUNICATIONS DESIGN  
AND CONSULTING, INC.  
MR. JIM WILLISON

To Whom it May Concern:

Mr. Willison worked as a consultant to my firm on the design of the "Water Tower Telemetry and Remote Monitoring" project for the Evansville Water and Sewer Utility. His work is accurate and technically sound, and it was produced in a timely fashion. Through Jim's suggestions, we were able to structure the bid in such a way that the Owner got a significant economic advantage, and our project came in 20% under budget.

I am pleased to recommend Mr. Willison of other radio telemetry design projects.

Sincerely,

KNAPP, GIVEN, VEAZEY AND SHOULDERS, ASSOCIATES, INC

Thomas H. Durkin, P.E.  
Director of Engineering
